

## Solutions for Database Management

Quest's market-leading database management products help you get more performance from your databases. Our built-in expertise and in-depth functionality equip your developers and DBAs with the productivity tools they need to improve database quality and performance.

Covering the entire database lifecycle, Quest delivers innovative products in three main areas:

- Code Quality and Optimization
- Performance and Availability
- Change and Configuration

### Code Quality & Optimization

#### Toad®

Toad is the de-facto standard for database developers and administrators. Toad increases productivity and application code quality while providing an interactive community to support the user experience. Toad is available for Oracle and MySQL.

#### DataFactory®

DataFactory populates development, test and QA databases with millions of rows of meaningful, syntactically correct test data, providing a realistic view of application performance before going live. DataFactory is available for Oracle, DB2, Sybase and MySQL.

#### Benchmark Factory®

Benchmark Factory is a load testing solution that prevents unplanned downtime and slow performance by testing system limits before going live. Benchmark Factory is available for Oracle, SQL Server, DB2, Sybase and MySQL.

#### SQL Navigator®

SQL Navigator is a PL/SQL development solution that streamlines workflow by adding a drag-and-drop, graphical user interface to the PL/SQL development environment.

#### SQL Optimizer™

SQL Optimizer offers complete SQL performance optimization with proactive detection of inefficient SQL, automated SQL rewrite and benchmarking capabilities. SQL Optimizer is available for DB2, SQL Server, Oracle and Sybase.

### Performance and Availability

#### Quest Central®

Quest Central is a suite of tools that enables users to quickly diagnose and resolve the cause of performance problems without manual trial and error or decentralized tools. Quest Central integrates extensive diagnostic capabilities to drill down to the root of the problem, automates tuning to resolve performance issues, and details historical analysis of performance metrics to understand when, why and how performance issues occurred. Quest Central is available for Oracle, SQL Server, DB2 and Sybase.

#### Foglight®

Foglight is a powerful console that monitors every tier in critical application technology stacks (including databases, networks, application servers, process schedulers and Web servers), alerting administrators to problems before they impact end users. Foglight database cartridges are available for Oracle, SQL Server, DB2 UDB and Sybase.

## Performance and Availability (cont.)

### Spotlight®

Spotlight diagnoses problems in real time by graphically displaying all application server activity in an intuitive user interface, enabling administrators to respond quickly to issues that need attention. Spotlight is available for Oracle, SQL Server, DB2 UDB, DB2 OS/390 and Sybase.

### SharePlex® for Oracle

SharePlex provides fault-tolerant, database, allowing users to maintain a near-real time database copy for reporting and high availability.

### LiteSpeed™ for SQL Server

Advanced backup and recovery software for Microsoft SQL Server providing integrated high performance compression and encryption technology that results in:

- 95% savings in data compression ratios
- 90% reduction of backup storage costs
- 75% reduction of backup and restore times
- 75% faster restores
- Improved overall performance

## About Quest Software, Inc.

Quest Software, Inc. delivers innovative products that help organizations get more performance and productivity from their applications, databases and infrastructure. Through a deep expertise in IT operations and a continued focus on what works best, Quest helps more than 18,000 customers worldwide meet higher expectations for enterprise IT. Quest Software, headquartered in Irvine, Calif., can be found in offices around the globe and at [www.quest.com](http://www.quest.com).

## Change and Configuration

### QDesigner®

QDesigner is a database and application design tool that combines object-oriented, conceptual and physical data modeling capabilities in a single, integrated environment to accelerate delivery of enterprise applications. QDesigner is available for Oracle, SQL Server, DB2, Sybase and MySQL.

### Schema Manager™

Schema Manager eases the deployment of schema changes from development to test to production by managing dependencies while maintaining control with extensive change documentation. Schema Manager is available for Oracle.
